30<sup>th</sup> December 2022

To whom it may concern:

**Ref: Urine metanephrines**

Following from our letter dated 22/11/2022, I am pleased to inform you that the analyser is now operational. This delay was caused by the late arrival of a spare part and power supply issues. We are now working through the backlog and expected to be up-to-date by 15/01/2023. The 5HIAA backlog has been cleared.

We apologise for any inconvenience this has caused to your referral services. If you wish to discuss prioritisation of specific samples, please contact the Metabolic Laboratory at King's College Hospital (tel. 020 3299 4128) or Dr Hakim Zouita (Operational Lead for Reference Biochemistry – tel. 020 3299 4141) for further information.

Yours faithfully,

Dr Hakim Zouita  
Operational Lead Reference Biochemistry  
Hakim.Zouita@nhs.net
