

# Incompatible haematology tubes from October 5

From 5 October onwards haematology samples at Guy's and St Thomas' Hospitals will be processed using new analysers.

There will be changes to compatible tube types. The tubes shown below must no longer be used.

Large (wide) EDTA tubes  
(16x100mm)

Large tubes &  
yellow top K<sub>3</sub>EDTA tubes  
(13x100mm)

Please switch to a compatible tube type. Any samples submitted in the tubes above from 5 October cannot be analysed.
